How the apps work

A step by step guide to the website, the mobile app, the staff desk, compliance tools and the management panel, with a screenshot of every screen.

Web platform

Public site, customer area, staff desk, management panel

Mobile app

Android and iOS, the same account and server

Edition

October 2026

How Desderia works

Desderia is a digital bureau de change made of two apps that share one server. Customers use the website or the mobile app to request currency at live rates, negotiate, pay and receive their money. Staff run everything from the desk, and every action is recorded in a tamper evident audit trail. This guide walks through each screen in the order people use them.

PART 1	The public website	3 screens
PART 2	Opening an account and signing in	4 screens
PART 3	The customer area	11 screens
PART 4	The mobile app (Android and iOS)	6 screens
PART 5	The staff desk	10 screens
PART 6	Audit and compliance	2 screens
PART 7	The management panel	6 screens
PART 8	Security, payments and the daily routine	Summary

The request journey and the people involved

The life of an exchange request

Submitted

>

Negotiating

>

Approved

>

Funds received

>

Paid out

>

Completed

A request can also end as Rejected by the desk, Cancelled by the customer before funds arrive, or Expired when an approved request is not funded within 24 hours.

Who uses what

ROLE	WORKS IN	MAIN JOBS
Customer	Website and mobile app	Request, negotiate, pay, receive, chat, identity documents
Teller	Desk	Review and approve, negotiate, confirm funds, pay out, identity review, chat
Manager	Desk, reports, audit	Everything a teller does, publish rates, float movements, reports
Auditor	Audit, reports	Read and verify the audit trail, download reports. Read only
Administrator	Management panel	Users, roles and every record in the system

The public website

What anyone sees before signing in. The site is fast, works on any phone, and shows live rates without an account.

1 Landing page

/

The first page visitors see. The quick converter shows what a customer pays or receives at today's rate as they type. Below it are the four promises of the service and the live rate board.

- Open a free account and Sign in sit top right on every page.
- Request this exchange takes a visitor straight to sign up, then to the exchange form.

2

Live rate board

/rates/

Buy and sell rates for every active currency in Tanzanian shillings, with the time each rate was last published by the manager.

- We buy is what Desderia pays when a customer sells foreign currency.
- We sell is what a customer pays when buying foreign currency.

CURRENCY	WE BUY	WE SELL
USD US Dollar Updated 03 Oct, 10:53	2,575.00 TZS	2,615.00 TZS
EUR Euro Updated 03 Oct, 10:53	2,790.00 TZS	2,850.00 TZS
GBP British Pound Updated 03 Oct, 10:53	3,270.00 TZS	3,345.00 TZS
KES Kenyan Shilling Updated 03 Oct, 10:53	19.60 TZS	20.40 TZS
AED UAE Dirham Updated 03 Oct, 10:53	695.00 TZS	715.00 TZS

3

Contact desk

/contact/

For visitors without an account. Every message receives an automatic email reply with a ticket number, and the desk is notified.

- Protected against bots and flooding: hidden trap field, time check and a limit of 3 messages per 15 minutes.
- Messages are handled in the management panel under Contact messages.

Visit or call

Branch Dar es Salaam

Hours Mon to Sat, 08:30 to 18:00

Response Within one business day

You will receive an automatic confirmation with a ticket number. Customers with an account get faster answers through in app chat.

Opening an account and signing in

Every customer signs in with email and password, and then confirms with a one time code. The phone number is required and verified.

4

Step 1. Register

`/auth/register/`

Full name, email, phone number and a strong password. Phone numbers can be typed in any form, for example 0754 123 456, +255 754 123 456 or 255754123456, and are stored in one standard format.

- One account per email and per phone number, enforced by the database.
- Passwords need at least 10 characters and common passwords are refused.

The screenshot shows the 'Open your account' registration form on the Desderia Bureau De Change website. The form is centered on a dark background. At the top left is the Desderia logo (a circle with an 'S') and the text 'DESDERIA BUREAU DE CHANGE'. To the right are navigation links: 'Rates', 'How it works', 'Contact', 'Sign in', and a highlighted 'Open account' button. The form itself has a title 'Open your account' and a subtext 'It takes a minute. You will verify your email and phone number next.' Below this are five input fields: 'Full name', 'Email', 'Phone number' (with a placeholder '+255 7XX XXX XXX'), 'Password', and 'Confirm password'. A note below the password field states 'At least 10 characters, not a common password.'

5

Step 2. Verify email and phone

/auth/verify/

A six digit code is sent to the email and another by SMS. Both must be confirmed before the customer can trade.

- Codes expire after 10 minutes, allow 5 attempts and work once only.
- A new code can be requested after 60 seconds.

The screenshot shows the 'Verify your account' page on the Desderia website. The header includes the Desderia logo, navigation links for 'Rates', 'How it works', 'Contact', and an 'Open dashboard' button. The main content area is titled 'Verify your account' and states: 'Both your email and phone number must be confirmed before you can trade.' Below this, there are two sections: 'Email' and 'Phone'. The 'Email' section shows an email address 'new@example.com' and a 'Six digit code' input field. Below the input field are two buttons: 'Verify email' and 'Resend code'. The 'Phone' section shows a phone number '+255712000777' and a 'Six digit code' input field. Below the input field is a 'Verify phone' button.

6

Step 3. Sign in

/auth/login/

Email and password first. The customer chooses to receive the confirmation code by email or by SMS.

- 5 wrong passwords lock the account for 5 minutes; the correct password is also refused during the lock.
- Forgot password sends a secure reset link by email.

The screenshot shows the 'Welcome back' sign-in page on the Desderia website. The header includes the Desderia logo, navigation links for 'Rates', 'How it works', 'Contact', 'Sign in', and an 'Open account' button. The main content area is titled 'Welcome back' and states: 'Sign in with your email. We will send a one time code to confirm it is you.' Below this, there are two input fields: 'Email' and 'Password'. Below the 'Password' field are two buttons: 'Code by email' and 'Code by SMS'. At the bottom is a large 'Continue' button with a lock icon.

Step 4. Enter the one time code

/auth/login/verify/

Only after the code is accepted does the session start. A stolen password alone is not enough to get in.

- Sessions end after 30 minutes without activity.
- Every sign in, sign out and failed attempt is written to the audit trail with the IP address.

The screenshot shows a web application interface for Desderia Bureau De Change. The header includes the logo, navigation links (Rates, How it works, Contact, Sign in, Open account), and a dark background. The main content area features a central card titled "Enter your code". The card contains the text: "We sent a six digit code to **client@desderia.test**. It expires in 10 minutes." Below this is a label "Six digit code" followed by a text input field. At the bottom of the card are two buttons: "Verify and sign in" (highlighted in yellow) and "Send a new code". The footer contains the text "Desderia Bureau De Change. Licensed bureau, Dar es Salaam." and additional navigation links (Rates, How it works, Contact, Terms, Privacy).

The customer area

Everything a customer does after signing in, on a computer. The mobile app in Part 4 offers the same features.

8

Customer overview

/exchange/

Greeting, counts of open and completed requests, identity status and unread alerts, recent requests with their status, and live rates.

- The left menu holds every customer page. On phones it becomes a bottom tab bar and a slide out menu.

The screenshot shows the 'Overview' page of the Desderia Bureau De Change customer interface. The layout includes a dark sidebar on the left with navigation links, a main content area with a greeting and summary cards, and a table of recent requests and live rates.

New exchange request

/exchange/new/

The customer chooses buy or sell, currency and amount, how they will pay us and how they want to receive. The quote on the right updates live as they type.

- Only valid payment and payout methods are shown for the chosen direction.
- Requests above USD 1,000 equivalent require approved identity documents.
- Each form carries a one time key, so a double click or a retry never creates two requests.

DESDERIA
BUREAU DE CHANGE

New exchange
Your rate is locked when you submit, while our desk reviews the request.

Buy foreign currency | **Sell foreign currency**

Currency: USD | Amount: 1500

How you will pay us: CashPay | How you receive: Bank wire

Send to: Choose a beneficiary

Purpose: Travel | Source of funds: Salary, business income, savings

Note for our desk

Your quote Live

Total in Tanzanian shillings
TZS 3,922,500.00
Rate 2,615.00 TZS per unit

This amount qualifies for rate negotiation after you submit.

Requests above USD 1000 equivalent need approved identity documents.

Submit request

/exchange/r/<reference>/

From 1,000 units, the customer may propose a better rate within the published band. The desk accepts, declines or counters. Each offer appears in the request and in its chat thread.

- Only one offer is open at a time. Accepting an offer fixes the rate and approves the request.
- The rate shown at submission stays locked for 10 minutes while the desk reviews.

The screenshot displays the Desderia Bureau De Change web application. The left sidebar contains navigation links: Overview, New exchange, My requests (active), Beneficiaries, Chat with us, Live rates, ACCOUNT, Notifications (13), Profile, Identity (KYC), and Security. The main content area shows a request titled 'DSD-EZBWRKPQ' for buying foreign currency, created on 03 Oct 2026 at 10:54. The request is in a 'Negotiating' state. It shows the user paying TZS 13,075,000.00 and receiving USD 5,000.00. A locked rate of 2,615.00 TZS is displayed. The negotiation section shows a 'Superseded' offer from the user at 2,600.00 TZS and a current offer from Desderia at 2,606.00 TZS with 'Accept' and 'Decline' buttons. Below this is a 'Propose this rate' button. A chat section titled 'Chat about this request' shows the request details, status, and a conversation where the user asks about cash collection and Desderia responds. A 'Cancel request' button is visible on the right.

You, 10:54

Yes, from 08:30. Bring your NIDA card.
Desderia, 10:54

Write a message

/exchange/r/<reference>/

After approval the customer pays. With CashPay they confirm their M-Pesa, Mixx by Yas or Airtel Money number and a payment prompt arrives on the phone. They approve it with their PIN and the request moves to Funds received by itself.

- Bank transfer shows the bank details and asks for the transfer reference. Cash means paying at the branch.
- If the prompt is missed, a new one can be sent after 2 minutes.
- The page refreshes on its own when CashPay confirms the payment.

The screenshot displays the 'My requests' page in the Desderia Bureau De Change application. The interface is dark-themed with a sidebar on the left containing navigation links: Overview, New exchange, My requests (active), Beneficiaries, Chat with us, Live rates, ACCOUNT, Notifications (13), Profile, Identity (KYC), and Security.

The main content area shows a request titled 'DSD-WU8A8T8V' with the description 'Buy foreign currency, created 03 Oct 2026, 11:35'. The status is 'Approved, awaiting funds'. The transaction details are as follows:

You pay	You receive
TZS 1,961,250.00	USD 750.00

Additional details include:

- Agreed rate: 2,615.00 TZS
- Funding: CashPay
- Payout: Bank wire
- Send to: My CRDB USD (CRDB Bank ending 6789)
- Purpose: School or university fees
- Fund before: 04 Oct, 11:35

The 'Timeline' section shows two events:

- Submitted** Quoted at 2,615.00 on 03 Oct 2026, 11:35
- Approved, awaiting funds** Approved at 2,615.00 on 03 Oct 2026, 11:35

Below the timeline is a 'Reason (optional)' field and a 'Cancel request' button.

The 'Complete your payment' section contains a message: 'A payment prompt for TZS 1,961,250 was sent to 255754123456 at 11:35. Enter your PIN on the phone. This page updates when CashPay confirms.' It also provides instructions: 'Pay with M-Pesa, Mixx by Yas or Airtel Money through CashPay. We send a prompt to the number below and you approve it with your PIN. The amount is rounded up to the whole shilling.' The mobile money number 255754123456 is displayed, and there is a 'Send a new prompt' button.

The 'Chat about this request' section shows the request ID and status: 'Request DSD-WU8A8T8V submitted at 2,615.00 for 750.00 USD. Status: Approved, awaiting funds. Approved at 2,615.00'. There is a text input field for writing a message and a send button.

The bottom of the sidebar shows the user's profile: 'Juma Client Customer' with a 'Sign out' button.

12

A completed request

</exchange/r/<reference>/>

Every step is recorded on the timeline with its time: submitted, approved, funds received, paid out and completed, including the payment and payout references.

- The customer confirms receipt with one tap once the payout is sent.

The screenshot shows the 'My requests' page for a specific request. The left sidebar contains navigation options: Overview, New exchange, My requests (selected), Beneficiaries, Chat with us, Live rates, ACCOUNT, Notifications (13), Profile, Identity (KYC), and Security. The main content area shows the request details for 'DSD-HW878Z68', which is a 'Buy foreign currency' request created on 03 Oct 2026 at 10:54. The status is 'Completed'. The 'You pay' section shows 'TZS 2,280,000.00' and the 'You receive' section shows 'EUR 800.00'. The 'Agreed rate' is 2,850.00 TZS. The 'Funding' method is 'Cash at branch'. The 'Payout' method is 'Cash pickup'. The 'Purpose' is 'Travel'. The 'Funding ref' is 'TILL-0042' and the 'Payout ref' is 'CASH-0042'. A 'Timeline' section on the right lists the following steps: Submitted (Quoted at 2,850.00, 03 Oct 2026, 10:54), Approved, awaiting funds (Approved at 2,850.00, 03 Oct 2026, 10:54), Funds received (Funds received, reference TILL-0042, 03 Oct 2026, 10:54), Paid out (Payout reference CASH-0042, 03 Oct 2026, 10:54), and Completed (Receipt confirmed, 03 Oct 2026, 10:54). A 'Chat about this request' section at the bottom shows the request details and status.

13

My requests

</exchange/requests/>

Full history with filters by status. On phones the table turns into cards.

The screenshot shows the 'My requests' page with a list of requests. The left sidebar is the same as in the previous screenshot. The main content area shows the title 'My requests' and the subtitle 'Every exchange you have requested.' There is a '+ New exchange' button. Below the title, there are filter buttons: All (selected), Open, Submitted, Negotiating, Approved, awaiting funds, Funds received, Paid out, Completed, Cancelled, Rejected, and Expired. A table lists the requests with columns: REFERENCE, TYPE, AMOUNT, RATE, TZS, STATUS, and DATE.

REFERENCE	TYPE	AMOUNT	RATE	TZS	STATUS	DATE
DSD-WU8A8T8V	Buy foreign currency	750.00 USD	2,615.00	1,961,250.00	Approved, awaiting funds	03 Oct 2026
DSD-FMPN8FDT	Sell foreign currency	300.00 GBP	3,270.00	981,000.00	Approved, awaiting funds	03 Oct 2026
DSD-HW878Z68	Buy foreign currency	800.00 EUR	2,850.00	2,280,000.00	Completed	03 Oct 2026
DSD-EZBWRKPQ	Buy foreign currency	5,000.00 USD	2,615.00	13,075,000.00	Negotiating	03 Oct 2026

14

Beneficiaries

</exchange/beneficiaries/>

Saved bank accounts and mobile money numbers where Desderia sends the money. Foreign currency bank accounts require a SWIFT code.

- Removing a beneficiary hides it but keeps it on past requests for the record.

15

Chat with Desderia

</exchange/support/>

Each request has its own chat thread. Customers can also open general conversations here. Replies from the desk arrive live and by email.

- Messages cannot be edited or deleted, so the conversation history is always complete.

Identity verification (KYC)

/account/kyc/

Legal name, ID type and number, date of birth, address, occupation and a photo of the document. Staff review and approve or reject with a reason.

- Photos are re-encoded on upload and stored privately. Only the customer and authorised staff can open them.

Notifications

/notifications/

Every status change, offer, reply and identity decision appears here and is emailed. Customers can switch request emails off in their profile.

</account/security/>

Change password and see every phone signed in to the mobile app. Any device can be signed out remotely.

- Changing the password signs out every mobile device automatically.

The screenshot shows the 'Security' settings page for Desderia Bureau De Change. The left sidebar contains navigation links: Overview, New exchange, My requests, Beneficiaries, Chat with us, Live rates, ACCOUNT, Notifications (with a badge '13'), Profile, Identity (KYC), and Security (highlighted). The main content area is titled 'Security' with the subtitle 'Password and signed in mobile devices.' It features two panels. The 'Change password' panel includes fields for 'Old password' and 'New password', a list of password requirements (e.g., 'Your password can't be too similar to your other personal information.', 'Your password must contain at least 10 characters.', 'Your password can't be a commonly used password.', 'Your password can't be entirely numeric.'), a 'New password confirmation' field, and an 'Update password' button. The 'Mobile devices' panel shows 'No mobile devices are signed in.' and a note: 'Changing your password signs out every device.'

The mobile app (Android and iOS)

A Flutter app with the same glass design, connected to the same server. A request made on the phone appears on the desk at once.

- The sign in token is kept in the iOS Keychain or Android Keystore and expires after 72 hours.
- The app signs out by itself after 15 minutes in the background.
- On Android, screenshots and screen recording are blocked inside the app.
- The website also works fully in a phone browser, as the last two screens show.

/reports/

Branded Excel downloads for a date range: requests, payments, treasury ledger, volume summary, balances and the audit trail. Totals are live Excel formulas and each file has a notes sheet.

- Every download is itself recorded in the audit trail.

Audit and compliance

Auditors and managers can trace every action in the bureau, by anyone, on web or mobile.

29

Audit trail

/audit/

Who did what, when, from which IP and on which channel, with filters by area, dates and text, and CSV export.

- Each entry stores a fingerprint of itself and of the entry before it. Changing or removing any entry breaks the chain.

</audit/verify/>

Recomputes every fingerprint from the first entry. A nightly job does the same. If anything was altered, the page names the exact entry.

The management panel

At /management/, in the Desderia theme, for administrators. Sign in uses the same two step login. Every record in the system is registered here.

31

Everything in one place

</management/>

Accounts and KYC, audit, users, groups and permissions, exchange requests, offers and timelines, notifications and the email log, contact messages, payments and gateway events, currencies and rates, chats and messages, treasury balances and ledger.

- Money and history records are read only here. They change only through the desk, which checks and audits each step.
- Any list can be exported: tick rows and choose Download selected as Excel.

32

Users, roles and groups

/management/accounts/user/

Create staff, set roles (customer, teller, manager, auditor, administrator), assign groups and deactivate leavers. Only superusers can edit users, so nobody can raise their own access.

Mobile number prefixes

/management/accounts/mobileprefix/

All Tanzanian mobile ranges from the TCRA numbering plan with operator, wallet and whether CashPay can send prompts to them. When an operator launches a new range, such as a new Airtel range, add one row here and it works immediately.

The screenshot shows the 'Mobile prefixes' page in the Desderia Management system. The page title is 'Select mobile prefix to change'. The left sidebar contains navigation menus for 'ACCOUNTS AND KYC', 'AUDIT', and 'AUTHENTICATION AND AUTHORIZATION'. The main content area displays a table of mobile prefixes with columns: PREFIX, OPERATOR, WALLET, CASHPAY SUPPORTED, IS ACTIVE, and NOTE. The table lists several prefixes, including 61, 62, 65, 67, 68, 69, 71, and 73, each associated with an operator (Halotel, Yas, Airtel, TTCL) and a wallet (HaloPesa, Mixx by Yas, Airtel Money, T-Pesa). A filter sidebar on the right allows filtering by operator, cashpay supported, and is active status.

PREFIX	OPERATOR	WALLET	CASHPAY SUPPORTED	IS ACTIVE	NOTE
61	Halotel	HaloPesa		☒	-
62	Halotel	HaloPesa		☒	-
65	Yas (formerly Tigo)	Mixx by Yas	☒	☒	-
67	Yas (formerly Tigo)	Mixx by Yas	☒	☒	-
68	Airtel	Airtel Money	☒	☒	-
69	Airtel	Airtel Money	☒	☒	-
71	Yas (formerly Tigo)	Mixx by Yas	☒	☒	-
73	TTCL	T-Pesa		☒	-

35

Email log

/management/notifications/emaillog/

Every email the platform sent, with recipient, subject and whether delivery succeeded. Message bodies are not stored because they can contain codes.

The screenshot shows the 'Email log' page in the Desderia Management system. The page title is 'Select email log to view'. The left sidebar contains navigation menus for 'ACCOUNTS AND KYC', 'AUDIT', and 'AUTHENTICATION AND AUTHORIZATION'. The main content area displays a table of email logs with columns: CREATED AT, TO, SUBJECT, STATUS, and ERROR. The table lists several email logs, including verification codes and chat messages, all sent on 3 Oct 2026. A filter sidebar on the right allows filtering by status.

CREATED AT	TO	SUBJECT	STATUS	ERROR

3 Oct 2026, 11:35 a.m.	root@x.test	Desderia: New exchange request	Sent	-

/management/payments/gatewayevent/

Every CashPay callback received, with the outcome: settled, failed, ignored as a repeat, or held for review with the reason.

Security, payments and the daily routine

The protections that run behind every screen, how a CashPay payment travels, and how a day at the bureau runs.

Security at a glance

Two step sign in

Password plus a one time code for every user, on web and mobile.

Lockouts and limits

Repeated wrong passwords lock the account. Every form and the API are rate limited.

No double payments

One paid payment per request and one use per reference, enforced by the database.

No double entries

Every new request, chat message and payment attempt carries a one time key.

Dual control

Large payouts need a second staff member. Payouts cannot overdraw a currency.

Tamper evident history

Audit, ledger, rates and chat cannot be edited or deleted, even in the database.

Secure CashPay callback

Secret address, optional IP allowlist and every field matched before money is applied.

Private documents

Identity photos are re-encoded and served only after an ownership check.

How a CashPay payment works

Customer taps Pay

Prompt on phone

PIN entered

CashPay confirms

Funds received

The server signs in to CashPay, creates a payment reference and sends the prompt to the customer's M-Pesa, Mixx by Yas or Airtel Money number. When CashPay reports the result, the money is applied only if the transaction, reference, amount and phone all match what was sent and the receipt number was never used before. Repeated reports are ignored, and anything that does not match is held for staff review instead of being applied.

Phone numbers

Every Tanzanian mobile number is accepted, in any format: Halotel 061 and 062, Yas 065, 067, 071 and 077, Airtel 068, 069 and 078, TTCL 073, and Vodacom 074, 075, 076 and 079. New ranges are added in the management panel under Mobile prefixes, without any change to the software. CashPay prompts go to M-Pesa, Mixx by Yas and Airtel Money numbers.

Automatic emails

Customers receive an email at every status change, for every new offer from the desk, for chat replies and for identity decisions. Staff are emailed about new requests, customer offers, reported payments, new chat messages, identity submissions and contact messages. Contact form visitors receive an automatic reply with a ticket number. Every email sent is listed in the email log.

A day at the bureau

WHEN	WHAT HAPPENS
Opening	Manager publishes the day's rates and records the opening float per currency.
During the day	Tellers work the queue and chat inbox, review identity documents and answer contact messages.
Closing	Manager compares balances with the vault and bank, records any adjustment, and downloads the day's reports.
Any time	Auditor reviews the audit trail and runs chain verification.

Where to go next

Setup and deployment are in **README.md** inside the web project. How the mobile app connects to the server is in **API.md**. The full day to day manual is in **OPERATIONS.md**. The mobile app has its own **README.md**.
